

David Murgulet

4th Year Computer Science Major

[Portfolio](#) | 604-353-4130 | davidgmurgulet02@gmail.com | [LinkedIn](#) | [GitHub](#)

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, JavaScript, TypeScript, CSS, HTML, PHP

Tools/Frameworks: Git, Docker, IntelliJ, VSCode, React, Node.js, Vue.js, MongoDB

Testing: JUnit, GDB, Mocha

PROJECTS

InsightUBC

September 2023

- Executed **Test Driven Design** for both black box and glass box testing using **Mocha** and **Chai** to develop a strong test suite
- Incorporated **Agile** process with a partner for a cohesive and effective approach to project delivery
- Utilized **JSZip** and **parse5** to access files and parse data to recover wanted information
- Implemented a **RESTful** server to query parsed information based on user inputs and display desired data to user
- Developed a full stack website using **TypeScript** and **React** to query files containing course and room information within UBC

HackBase

April 2023

- Designed a hackathon **DBMS** using **PHP** to manage all hackathon properties and query hackathon information based on user inputs
- Used **SQL** to implement multiple database tables and queries for filtering hackathon data
- Managed data within **Oracle** database and utilized API requests to retrieve and update information
- Backend communication with database was implemented using **PHP**, as well as **SQL**.
- Basic functions such as adding hackers to hackathons, or viewing tables can be done through the GUI

Study Spots

January 2023

- Developed a full stack website using **React** to allow students to browse and create reviews for study spots within UBC
- Constructed a **NoSQL** database using **MongoDB Atlas** to store and maintain information for study spots and their reviews
- Implemented a backend on **Node.js** which utilized a server to process and recover requested information to web users onto the frontend
- Designed a fully functional frontend using **React Bootstrap**.

Flash Card App

April 2022

- Built a simple flash card app using **Java** and **OOP** principles, along with a GUI implemented with **Java Swing**
- Supports functions like adding/removing cards to/from decks, and revising decks to practice a topic
- Implemented tests for project methods using **JUnit**
- Implemented saving and loading decks functionality using **JSON** files

EXPERIENCE

Sander

June 2022 – August 2022

Sofo Kitchens

- Sanded cabinet parts in preparation for finishing and final assembly.
- Assisted in delivery of finished products as well as cabinet assembly.
- Communicated efficiently with coworkers to avoid manufacturing errors and streamline the manufacturing process.

SFU Camps Volunteer

July 2019 - August 2019

SFU Summer Camps

- Collaborated with camp supervisor in order to keep camp activities running efficiently throughout the day.
- Assisted in the guidance of educational classes for the campers.
- Watched over a small group of campers on outside field trips, taking a leadership role independently from the camp supervisor.

EDUCATION

University of British Columbia

Expected in April 2025

Bachelor of Computer Science
